

Activator

Create a table and a graph.

Is there shading? Yes

x	y
0	-3
1	-1
2	1
3	3

Write any
solution.
(__, __)

****Need 2 colored
pencils today.**

$$y \leq 2x - 3.$$

Page #17
Lesson 5.5

Today's Objective

Unit 5

Lesson 5

Students will be to graph a system of inequalities and equations in standard form.

Today's New Vocab (1 of 3)

Write the inequality in Slope Intercept Form

$$Y = Mx + B.$$

Page #17
Lesson 5.5

$$y - 2x \leq -3$$

$$+ 2x \quad + 2x$$

$$y \leq -3 + 2x$$

$$y \leq 2x - 3$$

What is wrong with
the current inequality?

-2x is on the wrong side,

Because the "y" needs to be by itself.

Today's New Vocab (2 of 3)

Write the inequality in Slope Intercept Form.

$$Y = Mx + B.$$

$$3x + y \geq 7$$

What is wrong with
the current inequality?

$$-3x$$

$$-3x$$

$$y \geq 7 - 3x$$

$$Y \geq -3x + 7$$

The $3x$ is on the wrong side.

The “ y ” needs to be by itself.

Today's New Vocab (3 of 3)

Graph the inequality $f(x) \geq -3x + 7$.

Write a solution. (_____, _____)

x	y
0	-3
1	-1
2	1
3	3

Press TAB

x	f(x)
0	<input type="text"/>
1	<input type="text"/>
2	<input type="text"/>
3	<input type="text"/>

Work Period

Determine if the point $(2, 1)$ is a solution to the system?

$y - 2x \leq -3$	Page #18 Lesson 5.5	$3x + y \geq 7$
$(1) - 2(2) \leq -3$		$3(2) + (1) \geq 7$
$1 - 4 \leq -3$	Yes, both inequalities are True.	$6 + 1 \geq 7$
$-3 \leq -3$		$7 \geq 7$
Yes, $(2, 1)$ is a solution.		Yes, $(2, 1)$ is a solution.

Group Work Questions

Directions: All groups, please do all of the questions. Use your notes from last class to help you. [Ask 1 person before you ask me.]

Yesterday, we did Lesson 5.5 Notes.

Pg. 20 is ONLY extra Credit. NOT REQUIRED.

1st Stop @ 8:15 **Fast Exit Ticket today.

*One person from each group will present one question.

Exit Ticket

What is **the** solution to the system of equations?

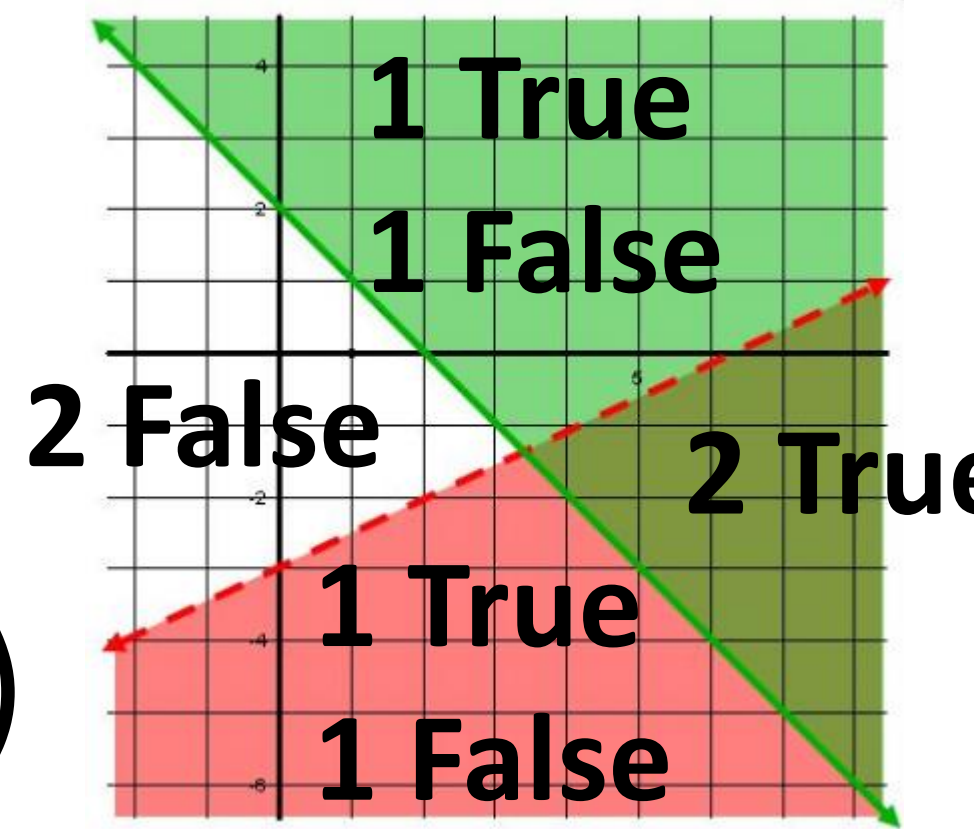

$(-2, -1)$

Page #18
Lesson 5.5

$(\underline{\quad}, \underline{\quad})$

Write a solution to the system of inequalities.

Lesson 5.5 Game

Each question asked earns \$1.

Matching

Match the graph, equations, and solution together. There should be

6 different groups with 3 in each group.

**Ask a partner for help before you ask me.
